

WE ARE THE RAIL REPLACEMENT EXPERTS

BEFORE AND AFTER OF RAIL REPLACEMENT PROJECT DELIVERED ON TIME AND WITHIN BUDGET - BOWEN BASIN (QLD)

Rail and anchored points at coal mines are subject to high levels of corrosion.

In such a highly corrosive environment, rails and associated components and foundations are subject to degradation and, eventually, failure. Our highly skilled and motivated team has the expertise and knowledge to manage every aspect of your rail replacement – ensuring your mine maintains both production and safety, now and into the future.
